Intel Unite® Solution – 4.2 PV

Release Details

Contents

The following components are contained in this release:

- Enterprise Server Installer (Includes PIN server, Admin Portal)
- Client app for Windows* and MacOS*
- Hub app
- Virtual Extended Display Driver Installer
- Intel Unite® Plugin for File Transfer
- Intel Unite® Plugin for Application Launcher
- Intel Unite® Plugin for Live Background
- Microsoft Outlook* Add-in for the Intel Unite® app

Requirements

There are no additional requirements for this release. Refer to the Enterprise Deployment Guide for a full list of requirements.

Release Notes

This release enables additional pairing modes, and the following key updates to the hub, server, and client apps:

Description	Server	Hub	Client
Updated valid platforms check		X	
WebRTC Update		X	X
Update for Logging (Windows only)		X	X

WebRTC Update

This release updates WebRTC to version 84. This update is backward compatible with previous versions of the hub and client apps. The client update was applied to Windows, MacOS, iOS, and Android.

Update for Logging

In previous versions of the Intel Unite apps on Windows, application logs were stored in %appdata%\temp\unite.sql. This release removes the dependency on SQLite, and updates how log files are stored. Log files can be found in %temp%\UniteLog\<yyyyMMdd>_log.txt.

Note: Logs > 7 days old are deleted automatically.

Known Issues

New Known Issues

Note: ID numbers have been updated to a new format.

ID	Feature	Issue	Resolution	Status
IUB-4394	Windows Client	When a user chooses to delete all organizations, only the first organization is removed.	The user will need to remove organizations one at a time.	Plan Fix
IUB-4384	Windows Client	If a user presents and enables remote annotations, and then stops and starts the presentation, the annotations persist when remotely viewing.	Errata. A user can manually clear the annotations, or disconnect and reconnect to the session.	Plan Fix

Previously Known Issues

ID	Feature	Issue	Resolution	Status
N/A	Linux Client	The Intel Unite® app for Linux doesn't yet support Wayland.	Users will need to re-install XOrg in order to use the Intel Unite® app.	Investigating
IUB-3163	Linux Client	When updating the Linux client app from v4.0 to v4.2, some user settings are not migrated.	Users will have to reconfigure some personal settings when migrating to 4.2.	Errata
N/A	Hub	Earlier versions of the Intel Unite® app for the Hub (4.1.413 or earlier) are not compatible with 10th Gen Intel® Core™ processors. Users with Hubs that have a 10th Gen Intel® Core™ processor will need to upgrade to Intel Unite® app version 4.1.6111 or later. This only affects the Hub app, earlier versions of the Client app will run on 10th Gen Intel® Core™ processors. Additionally, customers will see the following platform check error when trying to run Intel Unite® app for the Hub (4.1.413 or earlier) on 10th Gen Intel® Core™ processors.	KB Article	Errata
IUB-2047	iOS Client	Client app appears to be mirroring when not actually mirroring	Stop and restart presenting using the OS screen mirroring controls.	Plan Fix

IUB-2190	Mac Client	Yellow border/presentation controls on wrong monitor	Errata	Plan fix
IUB-1718	Client	When using Virtual Extended Display 2 cursors are shown on hub when the client has 3840x2160 Resolution with 200% scaling	Workaround: Set scaling to 150% or less.	Investigating
IUB-2023	Hub	Scaling issues when presenting with Virtual Extended Display to a 4K monitor	Errata	Investigating
IUB-2599	Client, Hub	When moderation mode is enabled, the client app will not execute the Take Over if the client is set to Presenter	Errata	Investigating
IUB-1404	Hub	Some plugins may not be visible if a client connects just after the hub app start because the hub is still loading the plugins.	Workaround – The client app can disconnect and connect again.	Investigating
DE6805, DE6811, DE6817	Client	When using a scheduled meeting and a 3.x hub and 4.0 hub have the same PIN, the clients may not auto connect to the session when added.	Workaround - Click on the scheduled meeting URL again or manually enter the session PIN.	Investigating
DE7575	Client	When auto pairing clients, if the URL (OTP) is mistyped, client SW launches and prompts for an email address.	Workaround - Correct the OTP and restart the pairing process.	Investigating

DE8199	Mac Client	When the Mac Client is connected to a hub and loses its network connection, it goes to the provisioning screen.	Workaround - Close and restart the Mac Client.	Investigating
DE8652	Client	SW with mouse hover-over data displaying may not appear while presenting the client to the hub.	Errata.	Investigating
DE8897	Mac Client	When using present an app to present video and it is changed to full screen view, the shared presentation freezes.	Workaround - Exit full screen mode or use A/V mode to present video.	Investigating
DE8901	Mac Client	If the present an app menu is opened then one of the applications are closed and still selected to be presented, when the Present button is clicked it will relaunch of the application previously closed. The "Present" button will also change to "Stop Presenting" then back to "Present".	Workaround - Close the present an app menu and reopen it to get the correct list of active applications.	Investigating
DE9025	Client	In client settings the option to "Automatically accept connection requests when hosting a session" is available on clients that don't support this feature.	Errata.	Errata.
DE9042	Client	When presenting with an extended display utilizing Chrome and a full screen video then stop presenting is selected the Chrome browser will not automatically move back to the client main screen.	Workaround - Reactivate the Chrome browser for it to appear on the main display.	Investigating

DE9195	Client	Utilizing a scheduled meeting then selecting "Add Room Display" there is no button to return to the scheduled meeting lobby.	Workaround - Click on the scheduled meeting URL again to return to the scheduled meeting lobby.	Investigating
DE9217	Admin Portal	Only the Admin user can edit the Admin acct e-mail or phone#.	Errata.	Investigating
DE9220	Windows Client	When two clients are presenting on the hub and one utilizes the advanced present menu - present an app without selecting an application, it can perform a takeover thus the active presentations.	Workaround - Make sure an application is selected in present and app, or do not select take over.	Investigating
DE9235	Mac Client	On the Mac Client using auto-pairing and the DNS test record then clearing the user pairing token will bring up a legacy screen.	Workaround - Close the app and restart.	Investigating
